PRESENTA pad

Enhancing learning environments by facilitating group interaction

The PRESENTA pad enables teachers to deliver dynamic lessons from anywhere in the classroom while learners are able to interact with lesson content from their seat.

This innovative teaching tool provides a simple and convenient means of stimulating whole class participation during any lesson or training session.

Natural and easy to use, the PRESENTA pad utilises wireless radio technology to enable teachers and learners to control a Windows based PC from up to 10 metres away.

By plugging our radio adapter directly into your PC and connecting to a digital projector, your PC's display can be projected onto a large screen for easy viewing by the whole class while the PRESENTA pad communicates wirelessly with your PC. The PRESENTA pad can easily be passed from teacher to student to encourage greater participation in the lesson. Individual students can solve a problem or write down their answer without leaving their seats.

Using the cordless battery free pen ensures participation is simple and convenient. By moving the pen across the surface. the teacher or learner can

Each PRESENTA pad is supplied with our Px interactive software containing a range of teaching resources including an electronic flipchart with annotation tools for writing and drawing, and attention grabbing features to highlight key points and enrich lesson delivery.

control the PC using the pad instead of the computer's mouse.

Lightweight and robust, the PRESENTA pad, used in conjunction with a portable projector and laptop, makes the perfect solution for teachers and trainers on the move.

PRESENTA pad specifications

Range	10m
Working pen proximity	5mm
Max number of tablets registered per computer	32
Battery life between charging	24 hours constant pen on surface use (typical usage of 3 hours per day would require charging after 2 months)
Charge time	Approx 3 hours
Battery technology	Rechargeable Lithium ion
Output rate	75 coordinate pairs per second
Operating temperature	2°C - 45°C
Channels	2, user selectable
LCD interface	Interactive for setup and status feedback
Resolution	1000 points (lines) per inch
Communication of tablet base station	RF 868MHz (UK)
Power save	Automatic sleep mode when pen has not been in contact with tablet surface for 1-10 mins, user selectable
Compliance	CE compliant and conforms with FCC 47CFR Part 15C
Overall dimensions	320 x 232mm
Active area dimensions	200 x 150mm
Active area diagonal	250mm
Weight	0.74kg
Pen description	Left click on the tip, right click on the barrel. Ergonomic design, battery free, tapered tip.

Base Station

Range	10m
Throughput	50 devices/second
Interface	7 LED device status display
Connection	USB 1.1 (1m cable length)
Channels	2
Communication	RF 868MHz (UK)
Compliance	CE compliant and conforms with FCC 47CFR Part 15C
Overall dimensions	86 x 68 x 34mm
Weight	117g
Warranty	1 year return to factory
